Engineering

# OVERVIEW

With a team of experienced professionals, OMS provides comprehensive, mechanical engineering compliance services to the mining industry.

- ▶ **EQUIPMENT COMPLIANCE AUDITS**
- ▶ **INTRODUCTION TO SITE INSPECTIONS**
- ▶ **MANAGER OF MECHANICAL ENGINEERING RESOURCES**
- ▶ **CONVEYOR BELT MAPPING, THICKNESS TESTING AND STANDARDS AUDITING**
- ▶ **UNDERGROUND COAL EQUIPMENT DESIGN VERIFICATION**

1

## EQUIPMENT COMPLIANCE AUDITS

Detailed mechanical equipment compliance audits against Australian Standards, Technical Reference Guides, Site Standards or any other reference material required as per the NSW Work Health and Safety Regulation.

- Underground Coal
- Exploration
- Surface Coal
- Underground Metalliferous Mines
- Quarries

2

## INTRODUCTION TO SITE INSPECTIONS

Our statutory qualified and experienced team can assist with site introduction inspections and management from either mine site or contractor side including

- Full ownership project management of site introduction process
- Safety file audits
- Equipment inspections

3

## MANAGER OF MECHANICAL ENGINEERING RESOURCES

Our team can supply experienced personnel holding a practicing certificate for Manager of Mechanical Engineering for Underground Coal Mines. Our team are available for short term leave coverage or longer-term appointment where required.

4

## CONVEYOR BELT MAPPING, THICKNESS TESTING AND STANDARDS AUDITING

Our Asset Management team can provide a range of conveyor services to keep your assets reliably operating including:

- Regular conveyor belt mapping including full belt map reports and traffic light condition assessments
- Conveyor belt thickness testing
- Defect identification
- Scraper condition assessment

5

## UNDERGROUND COAL EQUIPMENT DESIGN VERIFICATION

Our integrated Statutory and Design team can assist with mechanical design verification as required by legislation for registered plant. Our team can also assist with ongoing compliance assessments for registered plant.
